## THE SAFEST AF/ARMAFLEX EVER.

History meeting the future through generations. That's what AF/ArmaFlex stands for. For more than 40 years. We strive for perfection so you can benefit from the best ArmaFlex experience. Now it's time to discover the new generation in elastomeric insulation.

Today, in its 8<sup>th</sup> product generation, we present a new AF/ArmaFlex technology that combines excellent condensation control and energy efficiency with advanced fire safety. The new B/B<sub>L</sub>-s2,d0 product provides highest insulation reliability and contributes to the overall safety in buildings.

### // Fire safety

At Armacell, safety comes first and maximum reliability is crucial. AF/ArmaFlex Evo increases the fire safety in buildings. By mitigating the fire and smoke risk, it improves visibility and respiration, thus extending the time for evacuating a building safely in the event of a fire.

### // Antimicrobial protection

AF/ArmaFlex Evo is equipped with Microban®. These antimicrobial additives provide 'proactive' protection against harmful bacteria, mould and mildew. Armacell is the only manufacturer of flexible technical insulation materials to offer built-in antimicrobial protection.

### // Nominal wall thicknesses

Our signature product AF/ArmaFlex Evo is now also available with nominal wall thicknesses. This allows you to quickly identify which insulation thickness is required for a specific application. Our new product dimensions provide you with a wide range of inner tube diameters for a perfect fit on the various pipe dimensions providing maximum reliability to prevent condensation and energy losses.
