

Mechanical Fittings

Solutions for connecting PE pipes

Available in sizes 16mm to 125mm

A secure and reliable solution for joining polyethylene pipe in everyday water supply systems. Engineered for high performance and easy installation, these fittings create a robust watertight seal between pipe sections, ensuring long-lasting system integrity and leak-free operation.

Achieve a fit in seconds, without the need for specialist tools or pipe preparation. Simply insert the pipe up to the fitting stop and hand tighten on sizes up to 32mm (wrench recommended for 40mm and above).

FEATURES & BENEFITS

- **Captive seal**
The O-ring seal is captive within the fitting body ensuring it's always in the optimal sealing position
- **Demountable**
Enabling reuse or quick system modifications eliminating waste and saving costs
- **High performance**
Certified to withstand working pressures up to 16 bar for stability and reliability in demanding systems
- **Comprehensive range**
Variety of configurations including couplers, elbows, tees, and adaptors in 16-125mm
- **Regulatory approval**
Compliant with UK Water Supply (Water Fittings) regulations 1999 through KUKreg4
- **Robust build**
Constructed from high-grade polymer, resistant to corrosion, impact, extreme temperatures and UV
