

# Plass4 Universal Fittings

## Universal Coupler & Universal Elbow

Plass4 is a universal pipe fitting which connects metric polyethylene to a wider range of pipe types.

Plass4 connects metric polyethylene to other pipe materials such as imperial polyethylene (alkathene), copper (table X & Y), lead, galvanised steel, PVCu & poly-york.

Plass4 is easy to use with no specialist tools needed to complete the joint. The fitting is made from virgin polypropylene which makes it extremely strong and long-lasting. Plass4 fittings have a design life of 50 years, the same as our standard fittings.

Due to its versatility, only a few fitting sizes are needed to cover all pipes from 15mm to 50mm.

### KEY FEATURES

- Connects MDPE pipe to all metal pipe: imperial & metric, copper & steel.
- Connects plastic pipe, imperial & metric PE, UPVC & Poly-York.
- Allows for an immediate repair.
- Couplers available to cover the O/D size range 15mm to 50mm.
- Elbows available to cover the O/D size range 15mm to 32mm.
- Easy to use & no specialist tools needed.
- 50 year design life.

#### Technical Details:

Maximum Pressure	PN16
Operating Temperatures	Max 40°C / No minimum
Body Material	Polypropylene, high grade copolymer
Product Components	Nut Polypropylene, Grip ring acetal with integral stainless steel teeth, seal NBR
Standards	ISO 14236
